"COMPLIANCE DOESN'T HAVE TO BE EXPENSIVE OR TIME CONSUMING!"

Government regulation in the US and Canada **require a PPE Safety analysis** for all activities and jobs being performed. Most of us are short on manpower and our budgets are tight . . . satisfying this regulatory requirement and maintaining JSAs in a changing work environment is more difficult than ever.

JSAPLUS Software . . . The Technology Solution:

Using web software & mobile technology (handheld and cell phone options) - you can capture JSAs, PPE analysis and collect all your safety audits and data. www.JSAPLUS.com

How does the system work?

Simply log onto the web or mobile application & click those activities that are occurring on your work site. Our powerful database and reporting engines give you the compliance pieces you need.

"From drills to backhoes to stamping presses - a few clicks and JSAPLUS will provide you the PPE & safe work instruction reports you need for compliance. It's quick and you can stay high level or get as detailed as you want."

Brett Eavenson, Copper River Fabricators.

JSAPLUS technology helps make compliance quick while keeping safety awareness high.

We have developed a seamless link to Ergonomics, quality and other analysis modules . . . allowing JSAPLUS to be your "go to" for continuous improvement software.

Let JSAPLUS technology help you maintain compliance and improve safety performance.
