

- ◆ **Customized Ergonomic Program Development**

tailored not only to our clients' needs and goals but to company culture.

Human Engine can design, develop, and implement a sustainable, business-driven, cost effective, compliant, and results-oriented program. We can also audit and optimize existing ergonomic and safety programs.

- ◆ **Manufacturing and Industrial Assessments**

can include analysis of ergonomic, job safety, heat stress, materials strength, standard time, LEAN, Physical Demands Assessments, and other analysis tools. Assessments are prioritized and short-term and long-term solutions are developed. Human Engine will also assist with implementation and management of solution recommendations as needed.

- ◆ **Training** not only provides your staff with practical knowledge of the tools needed to put ergonomics to work - it also raises long term awareness. Training topics available include Safety/Hazard Identification, Ergonomic Identification, Back injury prevention, Six Sigma Green Belt certification, Physical Demands assessment, OSHA Compliance along with other customizable training options.

- ◆ **Return to Work** services will enable your restricted and lost time employees to return to work faster with less demands on other staff. Using your existing programs and policies as a starting point, we offer coordinated program development and Job Demands Assessment services. This assures efficient transitions to work assignments that add value and preserve morale.

CONSULTING SERVICES FOCUSED ON ROI

Human Engine, Inc. offers a range of consulting services through its staff of Certified Professional Ergonomists (CPE). Our consultants bring clients the benefits of many years of academic and industry experience in ergonomics, safety, performance improvement, industrial engineering, mechanical engineering and project management as well as Six Sigma statistical analysis training.

Human Engine takes a unique approach that maximizes the strengths of your current processes, methods, people and programs by augmenting them with our expertise. Our recommendations are always supported by Cost Justifications (ROI) and are calculated to result in a coordinated trend of improved human performance and higher profitability .
